

IB Learner Profile

The IB Learner Profile to cultivate learners who are:

What is Career-related Programme?

The most recent addition to the International Baccalaureate (IB) is the Career-related Programme, known as the IB Career-related Certificate. Its primary objective is to offer students aged 16 to 19 a range of pathways to choose from.

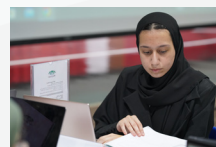

In the Career-related Programme, students are required to study the following:

1. a minimum of three Diploma Programme courses
2. the unique Career-related Programme core
3. career-related studies

DAS Career-related Programme Framework

These courses will be mandatory at DAS:

- IB DP English
- IB DP Math
- IB DP Arabic.

In addition, IB CP students are required to study one DAS or AP Science Course of their choice.

Career-related Studies

The IB collaborates with Pearson and their BTEC Level 3 Diplomas to provide ultimate service and resource to our students in business.

Pearson's BTEC courses can be used as the career-related study component portion of the CP. Students must complete the approved Level 3 Diploma (BTEC) from Pearson.

One notable advantage of the Career-related Programme is its adaptability, as schools have the flexibility to tailor the framework to meet local, regional, or national education requirements, as well as address the priorities of industry and government.

IB CP Course Elements:

The core elements of the Career-related Programme form its central foundation and aim to enrich students' personal qualities and professional growth. These core components contextualize the Diploma Programme courses and the career-related study, bringing together all aspects of the framework. Moreover, the core is specifically designed to foster the development of various characteristics and attributes described in the IB learner profile. It is important to note that all core elements are compulsory and include:

Personal and professional skills in the IB CP programme encompass critical thinking, communication, collaboration, self-management, and ethical decision-making, preparing students for success in various contexts.

Service learning involves students addressing community needs while enhancing their own learning and personal growth, fostering civic engagement and social responsibility.

Language development focuses on enhancing proficiency in a second language, promoting communication skills, cultural awareness, and intercultural understanding.

The Reflective Project is an independent research project that allows students to investigate an ethical issue of personal interest, promoting critical thinking, research, and reflection skills.

IB Course Assessment

At the end of the program, students participate in written exams that are evaluated by external examiners from the International Baccalaureate (IB). Additionally, students undertake assessment tasks within the school, which are initially graded by teachers and then reviewed by external moderators.

Each course is assigned a mark ranging from 1 (lowest) to 7 (highest).

CP Insights: FAQs and Answers

Q: Who should think about the IBCP?

A: Any student who wants to pursue career-related learning along with the challenging IB components should consider the IBCP.

Q: What advantages does an IBCP certificate offer?

A: With an IBCP certificate, students can merge their academic studies with their personal career interests. They'll acquire important skills for the workplace, earn certifications, and gain a deeper understanding of global issues relevant to their chosen pathway. Additionally, they'll have opportunities to network and gain real-world experience through job shadowing.

Q: What do students need to do to get the IB Certificate of the Career-related Programme?

A: To be considered for the IBCP, students must fulfill the following requirements:

Achieve a grade 3 or higher in at least two Diploma Programme courses.

Achieve a grade of at least D for the reflective project.

Meet the requirements for personal and professional skills, service learning, language development, and Career-related studies.

Avoid any penalties for academic misconduct.

Q: Do colleges and universities acknowledge the IB CP?

A: Yes, colleges and universities recognize the IB CP. The IB has demonstrated that students who complete the program are well-prepared for university studies. The IB CP has gained a reputation for offering career-related pathways that align with university education.

University Opportunities

While IB students have the freedom to apply to any university of their choice, the International Baccalaureate collaborates with certain universities to establish recognition policies that outline the specific requirements for IB students.
